(< and > input gradual dynamics with the default appearance; other *cresc/dim* entries override the **Gradual style** property)

Fingering (Shift+F)

The list below is not comprehensive: numbers between 1 and 7 can be entered in place of the numbers shown below. (Although humans typically only have a maximum five fingers on each hand, trombones have seven slide positions, and Dorico's fingering features can be used for keyboard, mallet percussion, valve and slide brass instruments, and string instruments.) On a fretted instrument staff, press the up/down arrow keys to switch between inputting fingerings for the left (L)/right (R) hand, as indicated by the popover icon.

1 3 5 fingering on current staff	1,3,5
2 4 fingering for left hand (non-	L2,4 (left), G2,4 (<i>gauche</i>), S2,4 (<i>sinistra</i>), I2,4 (<i>izquierda</i>) or H2,4 (<i>hidari</i>)

Fingering shift	/ after finger, e.g. 2/

Figured bass (Shift+G)

The list below is not comprehensive: you can enter the numbers 1-19 in any order, Dorico will automatically arrange them in ascending order. To clarify separate figures, use a comma. Dorico can infer figures from what you enter and the harmonic context, such as converting chords into figures.

Sharp accidental	# or s (Tip: for a raised 3 rd , just # is sufficient)
Natural accidental	n

Flat accidental	b or f
Triple sharp	x# , #x , ### or ts
Double sharp	x , ## or ds

Note tools (Shift+I)

Includes adding notes above/below existing notes, transposing notes, and transforming notes (e.g. retrograde, inversion, etc). The examples below are representative rather than comprehensive; you can specify any interval between 1 (unison) and 15 (two octaves); positive numbers add above the top note of the chord or transpose upwards, and negative numbers add below the bottom note of the chord or transpose downwards.

Transpose up by perfect fifth

tp5, tper5 or tperf5

Transpose down by a minor second

t-m2, t-min2 or t-minor2

Transpose top note of chord down by an octave (change inversion)

t top -8

Transpose bottom note of chord up by an octave (change inversion)

t bottom 8

Add note an augmented fourth above

a4, aug4 or augmented4

Add note a diminished fifth below

-d5, -dim5 or -diminished5

Add note a third above

3

Add note a sixth below

-6

Add a second, fourth and minor 7th above

2,4,m7

Add third below top note of chord

-3 top

Add fourth above bottom note of chord

4 bottom

Tuplets (;)

Tuplets are described as ratios: [desired number of notes]:[number of notes whose space the tuplet should occupy]. The note value is the currently selected duration in the Notes panel, unless you specify the value as part of the tuplet. Add "." (period) for a rhythm dot. (When using a number to specify the beat unit, you must separate the tuplet ratio from the beat unit using a space or hyphen.)

Triplet, three notes in the space of two

3, 3:2, 3/2, or 3 2 (separated by space)

Triplet, three notes in the space of four

3:4, 3/4, or 3 4

Quadruplet, four notes in the space of three

4:3, 4/3, or 4 3

Quintuplet, five notes in the space of two

5:2, 5/2, or 5 2

Quintuplet, five notes in the space of four

Sextuplet, six notes in the space of four

6:4, 6/4, or 6 4

Septuplet, seven notes in the space of four

7:4, 7/4, or 7 4

Nonuplet, nine notes in the space of eight

9:8, 9/8, or 9 8

Duplet, two notes in the space of three

2:3, 2/3, or 2 3

Quintuplet, five notes in the space of six

5:6, 5/6, or 5 6

Quintuplet, five dotted quarter notes in the space of four

5:4q., 5/4q., or 5:4-6.

Beat units

You can use these in any popover that specifies note durations: **tempo** for metronome marks, **tuplets**, **bars and barlines** for adding/removing beats

Cues (Shift+U) – Dorico Pro only

Simply start typing the name of the instrument you want to cue, then use the down arrow key to select it from the list, and hit **Return**.

MIDI trigger regions (Shift+0 [zero])

	Pitch and octave, e.g. C4 , Bb2 , or F#5
Notes to be triggered in the region	MIDI note number, e.g. 60 , 46 , or 78
	Play notes on a MIDI keyboard (also sets velocity)
Velocity	add 0 to 127 in parentheses after last pitch, e.g. (112)

Playing techniques (Shift+P)

As you start entering a playing technique, a list appears with valid entries, which you can select.

Add “->” at the end of your entry to give the playing technique duration, which extends with the caret during note input; enter **?** to end duration without inputting another playing technique.

Outside of note input, entering 2 playing techniques separated by “->” automatically groups them.

Enclosing playing techniques in parentheses, such as **(pizz.)**, inputs them as hidden.
